Forecast for Sunday 22 May 2022

Weather: Skies becoming overcast during the early hours with cloud lowering to give widespread hill fog, and with some patchy drizzle in places around dawn. It will become dry by mid-morning with the cloud lifting and breaking to give some sunny spells by early afternoon. Cloud increasing and lowering again early evening perhaps giving some further patchy drizzle and a cloudy end to the day.

Chance of cloud-free hill tops above 600m: 20% at first increasing to 90% by midday, then falling to 40% by early evening.

Low cloud and visibility: Areas of low cloud initially around 600m will become extensive and lower to cover most slopes above 400m by dawn. Cloud will slowly lift during the morning and break to small amounts near 700-800m by midday. Cloud lowering again early evening onwards to cover some west facing slopes above 500m. Visibility generally good beneath cloud, however any drizzle will bring locally poor visibility.

Forecast for Monday 23 May 2022

Weather: Dry at first on Monday with a few bright spells. Occasional showers developing during the morning, these locally heavy with a risk of hail and thunder and merging to give some more prolonged periods of rain in the afternoon. Showers tending to become more isolated and ease a little during the evening.

Maximum wind: Westerly 15mph gust 25mph.

Chance of cloud-free hill tops above 600m: 40% or less during the early hours, improving to 80% by mid-morning.

Low cloud and visibility: Areas of cloud will cover many slopes above 400-500m during the early hours, but will lift and break to small amounts near 700m by mid-morning. Visibility beneath cloud generally good, but deteriorating to locally poor in showers, hail and any thunderstorms.

Temperature: **Valleys:** Plus 9 Celsius becoming plus 15 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Above the summits.
